A severe test for any shortening is its use in hot bread. Make some Crisco biscuit; they are delicate—in looks, odor and taste. They are light and daintily brown. Break one open and you will be delighted with the appetizing aroma, free from any suggestion of lard. They are just as wholesome and digestible as their delicacy promises.

You will find equally as attractive points about Crisco in other branches of cooking. For instance, you can fry without smoke and odor. You can use the same Crisco for frying all manner of foods and all will have a new wholesomeness.

You can make a light rich cake with Crisco which will keep fresh and moist longer.

You will obtain delicious, digestible and economical foods by knowing Crisco better.

Below is a good biscuit recipe, or you may use your own favorite recipe by using from 1/5 to 1/4 less Crisco than you would of lard. Note how Crisco stands the test.
